

We claim:

1. An illuminated bubble wand comprising:  
  
a bubble wand assembly comprising a shaft connected to a  
bubble forming attachment; and  
  
5 a means for illuminating the bubble wand assembly.
2. The illuminated bubble wand of claim 1 wherein the means  
for illuminating the bubble wand assembly comprises a switch  
LED.
3. The illuminated bubble wand of claim 1 wherein the means  
10 for illuminating the bubble wand assembly comprises a battery  
activated LED.
4. The illuminated bubble wand of claim 1 wherein the means  
for illuminating the bubble wand assembly comprises a motion  
activated LED.
- 15 5. The illuminated bubble wand of claim 1 wherein the means  
for illuminating the bubble wand assembly comprises a  
mechanically activated LED.
6. The illuminated bubble wand of claim 1 wherein the means  
for illuminating the bubble wand assembly comprises a twistably  
20 activated LED.
7. The illuminated bubble wand of claim 1 wherein the means  
for illuminating the bubble wand assembly comprises a rotatably  
activated LED.
8. The illuminated bubble wand of claim 1 wherein the means  
25 for illuminating the bubble wand assembly comprises a chemi-  
luminescent light source.

9. A toy suitable for forming bubbles comprising:  
  
a container having an opening;  
  
a container cap releasably attached to the opening; and  
  
a bubble wand assembly comprising a shaft connected to a  
5 bubble forming attachment; and  
  
a means for illuminating the bubble wand assembly.
10. The toy of claim 9 wherein the means for illuminating the bubble wand assembly comprises a switch LED.
11. The toy of claim 9 wherein the means for illuminating the  
10 bubble wand assembly comprises a battery activated LED.
12. The toy of claim 9 wherein the means for illuminating the bubble wand assembly comprises a motion activated LED.
13. The toy of claim 9 wherein the means for illuminating the bubble wand assembly comprises a mechanically activated LED.
- 15 14. The toy of claim 9 wherein the means for illuminating the bubble wand assembly comprises a twistably activated LED.
15. The toy of claim 9 wherein the means for illuminating the bubble wand assembly comprises a rotatably activated LED.
16. The toy of claim 9 wherein the means for illuminating the  
20 bubble wand assembly comprises a chemi-luminescent light source.
